

Test Utilisation

The screenshot displays the 'Orders' section of the eHospital system. The interface includes a top navigation bar with tabs for 'Active', 'Signed & Held', 'Home Meds', 'Cosign', 'Order History', 'Blood Orders', and 'Recurring Treatment'. Below this, there are filters for 'Sort by: Therapeutic Class' and 'Go to: Lab'. The main content area is divided into 'Lab' and 'Therapy' sections. In the 'Lab' section, three orders are listed: 'Creatinine/Electrolytes + Urea', 'CRP', and 'Full Blood Count'. The 'Full Blood Count' order is highlighted in purple, indicating it is a duplicate of an active order. A red box highlights a notification that says '1 procedure matching "Full Blood"'. The 'Therapy' section lists 'Physiotherapy assess and treat' and 'SLT assess and treat'. On the right side, there is a 'Summary' panel with 'Orders' selected, showing 'Manage Orders' and 'Go to Order Sets' buttons, and a 'New Orders' section with a 'Full Blood Count' order listed.

- When placing an individual order, if it is a duplicate of an active* order, this is highlighted in purple

* active = test that has been ordered but not yet taken
